

MuteBarrier 5kg/m² Product Data

Description: MuteBarrier 5kg/m² is a great way of attenuating low levels of airborne noise where space is at a premium. It has also been used as a sound proof curtain, between plasterboards and draped over joists to reduce sound transmission. MuteBarrier is suitable for retro-fits and new builds.

Dimensions: 5m x 1200mm x 2mm

Mass: 5kg/m²

Features and Benefits: Can be used as a single sheeting or to improve results, used as part of our MuteBarrier 5kg/m² System. Suitable for reducing low levels of airborne noise, please see a guidance below to give you an indication of context in sound. Impact noise will not be noticeably reduced with MuteBarrier. MuteBarrier is a PVC Mass Loaded Vinyl.
