

SoundPlank Product Data

Description: SoundPlank 19mm is a high mass acoustic plasterboard to reduce airborne noise transference and it is best coupled with other materials such as our MuteClip® System for optimum performance. Due to the particular paper finish, plaster does not tend to be applied directly to the face of SoundPlank.

Dimensions: 19mm x 2400mm x 600mm

Mass: 12.5 kg/m²

Thermal Conductivity: 0.19 W/mK

Features and Benefits: Used with either our MuteClip® System or Tecsound range.

Brown paper finish, skim and plaster should not be applied directly over the top.

Tapered edge or Straight edge.
