

Perimeter Flanking Band FB8 Product Data

Description: Perimeter Flanking Band FB8 is used to line the perimeter of each room where a high floor build up is a requirement or a screed layer is required. This is to butt all floor layers against to reduce impact transferring in to the adjacent walls.

Dimensions: 8mm x 150mm x 50m

Weight: 6 kg

Features and benefits: Suitable for concrete screeding
Closed cell foam structure
Plastic apron to keep an airtight seal
