

Tecsound SY50 ALU Product Data

Description: Tecsound SY50 ALU (Aluminium Faced) is a self-adhesive, visco-elastic membrane with an aluminium facing which acts as a decorative facing especially in industrial settings. This helps to reduce airborne and vibration in multiple ways including; floor, ceiling, walls and applying directly to metal work for optimum reduction in vibration.

Dimensions: 3mm x 6.05m x 1.22m (7.38m²)

Mass: 5 kg/m²

Density: 2000 Kg/m²

Thermal Conductivity: 0.037 W/m°C

Temperature Stability: -20°C to 60°C

Compressive Strength: 4.84 Kg/cm²

Tensile Strength: 30 N/cm²

Features and Benefits: Suitable for reducing both airborne and vibration on a large array of surfaces with an aluminium facing.
Very flexible and adaptable material.
Best used as a direct application to metal work to reduce vibration, commonly used within industrial settings such as; machinery boxing, mezzanine levels and steel floor sheeting.
Self-Adhesive backing for easy installation.
Mould moisture and fungus resistant.
Easy to mould into tight spaces.

Performance: Rw =25.2dB Reduction hung as a curtain.
Vibration Dampening
