

Isolation Strip P8 Product Data

Description: Isolation Strip is a rubber-crumb, self adhesive strip that is used to decouple structural elements such as sub flooring and stud work from the adjacent surfaces ultimately helping to reduce impact noise issues passing through a structure. Each strip deviates between 4 - 8mm, helping to spread the load.

Dimensions: 4 - 8mm x 46mm x 2m
Density: 750 kg/m³
Weight: 500g
Compression Loads: 10 kN/m² = < 7% loss of thickness.
(Over 10 Years) 15 kN/m² = < 10.6% loss of thickness.
20 kN/m² = < 14.3% loss of thickness.

Features and Benefits: Primarily used on top of a joist.
Also used around the perimeter of a stud frame or anywhere to create separation and reduce the transfer of vibration.
Mould, bacteria, fungi and water resistant.
Does not fail under heavy loads.
92% recycled content.
Varied height from 4 - 8mm for less contact area.
Self-Adhesive for ease of installation.
