

MuteBloc™ Product Data

Description:

MuteBloc™ is a high quality, stable and high performing pad for stopping weight drop impact noise, designed primarily (but not exclusively) for Gym areas that include; cross-fit, free weights and deadlift platforms. These are supplied in sets of two to allow weights to be dropped from height at ease, reducing shock and vibration causing issues with neighbouring properties in both commercial and residential settings.

Dimensions:

725mm x 620mm x 130mm

Weight:

11 kg

Colours:

iKoustic Blue (Additional colours are available)

Features and benefits:

PVC 600gsm casing

Heavy duty zip

Specific density of foam to absorb impact

Highly durable with fitted and flat straps to avoid trip hazards

Double stitched seams

Gripped base to avoid movement
