

# MuteClip® Product Data

**Description:** MuteClip is unique in its design with its dual density rubber polymers that are designed and assembled to improve noise reduction over a broad range of frequencies whilst remaining stable and consistent with each MuteClip. Requiring only a single fixing, the MuteClip looks to minimize the points of contact with both wall and ceiling partitions.

**Dimensions:** 75mm x 35mm x 29mm

**Maximum Load:** 16 kg (36 lb) per each MuteClip

**Temperature Stability:** -35°C to +100°C

**Features and Benefits:** Dual density rubber isolator.  
Dramatically reduces airborne and impact noise as a high performing, slimline acoustic system.  
Only one fixing per MuteClip allows for easy installation.  
Can be used on metal, wooden, brick and concrete structures.  
Reduced points of contact to help de-couple ceiling and wall systems.  
Significantly improves sound control in both high and low frequencies
