MuteClip XP Product Data

Description: MuteClip XP (Extended Profile) is unique in its design with it's dual density rubber polymers that are designed and assembled to improve noise reduction over a broad range of frequencies whilst remaining stable and consistent with each MuteClip XP. The extended profile helps to accommodate varying joist and room depths whilst never compromising in performance.

Dimensions: 75mm x 45mm x 134mm
Unit Weight: 174 g
Maximum Load: 16 kg (36 lb) per each MuteClip

Features and Benefits:
Dual density rubber isolator.
Extended profile design to accomodate varying room and joist heights.
Dramatically reduces airborne and impact noise as a high performing, slimline acoustic system.
Can be used on metal, wooden, brick and concrete structures.
Reduced points of contact to help de-couple ceiling systems.
Significantly improves sounds control in both high and low frequencies.
Significant improvement over standard resilient bars in both performance and fitting.

Performance:

Ceiling	DnT,w + Ctr = 54 dB
	L'nT,w = 53 db

Performance will vary with different structural make-up. Please see performance data for examples.
