

# Heat Pump Noise Control

iKoustic & The University of Salford

## EFFICIENCY UNAFFECTED

Since designs do not breach manufacturer guidelines, the **efficiency** of the heat pump should remain unaffected

## MODULAR DESIGN

**Modular** solutions ensure otherwise hard to reach installations can be adequately **controlled**, with the option to **tailor designs** to specific installations

## AESTHETICALLY NON-INVASIVE

Unobtrusive design ensures **solution** is suitable for both industrial *and* **residential** settings

## IMPACTFUL NOISE REDUCTION

Research conducted at the University of Salford has demonstrated the performance capabilities of barriers for heat pump **noise control**.

In partnership with  
**ROCKWOOL Noistop® Essential**

efficient tailored designs save money.

approval more likely due to increased screening effects.
