

MuteClip® LP

Product Data.

MuteClip® LP is uniquely designed with dual-density rubber polymers to reduce noise across a wide range of frequencies. Each clip delivers reliable, consistent performance. The adopted low-profile helps to reduce the loss of room height while never compromising performance. It requires only one fixing point, which minimises contact with the ceiling surface and improves overall sound isolation.

Dimensions:	50mm x 105mm x 74mm
Unit Weight:	174 g
Maximum Load:	16 kg (36 lb) per each MuteClip®

Features and Benefits:

- Low-profile design to minimise loss of room height.
- Dual-density rubber isolator.
- Dramatically reduces airborne and impact noise as a high-performing, slimline acoustic system. Only one fixing per **MuteClip®** allows for easy installation.
- Can be used on metal, wooden, brick and concrete structures.
- Reduced points of contact to help decouple ceiling and wall systems.
- Significantly improves noise control in both high and low frequencies.
