

MuteBoard® 2

Product Data.

MuteBoard® 2 is a dual-layer soundproofing panel engineered for effective airborne noise reduction in space-conscious wall and ceiling applications. It features a combination of a high-density 15mm acoustic plasterboard and a 3.5mm Tecsound SY70 visco-elastic membrane, delivering both mass and vibration damping in a slimline form. Ideal for upgrading from standard or acoustic plasterboard, **MuteBoard® 2** is suitable for retrofits and new builds alike.

Dimensions:	18.5mm x 1200mm x 1200mm
Sheet Size:	1.44 m ²
Mass:	19.5 kg/m ²
Sheet Weight:	25 kg

Features and Benefits:

- Dual-layer configuration optimised for airborne sound insulation.
- Slimline profile enables direct application to masonry where space is limited.
- Tapered-edge plasterboard finish ready for skim or plaster.
- Ideal for stud wall upgrades or layering into acoustic systems.
- Suitable for both wall and ceiling installations.
- Integrated Tecsound SY70 enhances vibration damping and acoustic performance.
